

Tip OF THE WEEK

Easy Mixing Directions for Sunshine Factor or Booster with Bird's Dry Food

1. Pour 1 lb (454 g) of the bird's food into a large bowl.

2. Massage a 15-ml packet in your hand for a few seconds to liquefy. Squeeze contents of packet over food (1 packet per 1 lb of food).

3. Stir to coat the food. Return top-dressed food to the original bag. Feed normally.
