

Tip OF THE WEEK

Applying Soother Plus to a Small Area with a Bandage

1. Squeeze approximately 1 tsp Soother Plus into a small bowl.

2. Cut the gauze into strips and press them into the Soother Plus. Allow the strips to remain for a few minutes until completely soaked.

3. Apply the Soother Plus-soaked bandages to the lesions. Wrap plastic film over the bandages so the outer layers do not absorb all the cream. Repeat and replace bandages every 2 days.
