

# Tip OF THE WEEK

## 15-ml Packets as a Refill

If you would like to use the ecologically sustainable and less expensive packets, but still be able to store the Booster<sup>®</sup> or Sunshine Factor<sup>®</sup> in a resealable glass vial, use this quick and easy method.

1. Massage a 15-ml packet in your hand for a few seconds to liquefy.
2. Use a sanitized glass bottle or request one when you order the packets.\*
3. Open the packet and slowly squeeze the Booster<sup>®</sup>/Sunshine Factor<sup>®</sup> into the bottle.

Booster<sup>®</sup>/Sunshine Factor<sup>®</sup> can then be administered orally by body weight of the animal, resealed and stored easily after each use.

\*A nominal fee may apply.
